

Cyprian Matykiewicz

Cyprian works at Future Processing (FP) – a leading Polish tech and innovation company located in Gliwice, where he is responsible for assisting Automotive companies with their objectives through suggesting bespoke software solutions.

His daily work is about figuring out how the technology supplied by FP can bring value to the Automotive industry at every stage of its value chain.

Cyprian is also an enthusiast for the development of technologies used in cars for safety and driver assistance, as well as a fan of automotive novelties.
