

Riccardo Fontana

Riccardo Fontana is graduated in electronic engineering at Turin polytechnic.

He worked from 1999 to 2004 at the Intl Rectifier Italy, semiconductor company, in the High power modules R&D area.

In 2004 he reached Bitron covering different roles, first as HW electronic design engineer and then he moved to program management.

He served as a key account manager for main appliance customers and is now responsible for EV power charging systems business development.
